

**We've processed your Assignment extension request FORM-AEX-62150**

no-reply@qut.edu.au <no-reply@qut.edu.au>

Thu 28/04/2022 6:04 PM

To: Fauzan Armia <fauzan.armia@connect.qut.edu.au>

Hi Fauzan,

Thank you for your assignment extension request **(FORM-AEX-62150)**.

We have approved your request and the due date for your assignment **Progress Report and Prototype**, for unit CAB302 has been extended by 48 hours from the original due date. If your unit outline does not specify that your assignment is eligible for an extension, this confirmation email is not valid and unless you submit by the original due date, the late assessment policy will apply.

**A copy of this email must be attached to the front page of your assignment when you submit it.**

You are responsible for:

- Ensuring that this assignment is eligible for extension before submitting it after the original due date.
- Attaching a copy of this email to your assignment when you submit it.
- Informing other members of your group of this extension.

Be aware that a copy of this email is kept on file. You should not alter this email in any way. Email notifications that have been altered or differ in any way from the original may result in an allegation of student misconduct as set out in the [Student Code of Conduct](#).

**Need extra support?** You can access free, confidential [counselling with qualified professionals](#). We also offer [planning and support if you have a disability, injury or health condition](#) that affects your ability to study. If you are struggling to meet your university commitments, [academic support](#) is also available.

**Have a question?** Check our online help on [late assessment and extensions](#). We're also available to help you, visit the [HiQ website](#) for contact details and opening hours.

## User Stories

The team has allocated priorities and story points to the provided user stories to help us to understand what implementations are the most essential to the project. This can be seen in the table below. 'Must have' priorities will be necessary implementations, 'Should have' are implementations that are important, and which a great deal of effort should be expended to implement them, but which are not integral to the project and its success, and 'Nice to have' will be implementations which would be beneficial to implement, but are not essential. The team will aim to implement everything included in the table below, however due to complexity of the project, time constraints, and potential unforeseen circumstances, not all of it may be implemented. This is why the team decided to create user stories.

The story points represent the amount of effort required to implement a user story, where 8 represents the greatest amount of effort, and 1 the least. Story points are utilised in the release plan to assist in planning how much work the team should aim to complete for each release so as to keep them on track.

Best Interest of	User Story	Priority	Story Points
<b>Maze designer</b>	Creating an automatically generated maze that can be edited post creation. Maze has a maximum size of 100x100 units.	Must Have	8
<b>Maze designer</b>	Maze having the option of inserting a logo within it which is not in the path of the maze itself	Must Have	4
<b>Maze designer</b>	Change the entrance and exit of the maze to a logo/picture that is targeted towards children	Must Have	4
<b>Maze designer</b>	Be able to give the maze a title, also providing credentials of who created the maze and finally including date and time the maze was first created and last edited	Must Have	1

<b>Maze designer</b>	Have a button to show that at any point of starting the maze that it can be completed. This includes a % to show how much of the maze is left to explore.	Nice To Have	8
<b>Maze designer</b>	A toggle button to show the optimal/fastest path for the maze that's being created to be solved	Should Have	4
<b>Maze designer /User</b>	Requires a user-friendly GUI interface for both the maze designer and the user	Must Have	2
<b>Publisher</b>	Be able to see a list of created mazes, along with who created them and the date and time.	Must Have	2
<b>Publisher</b>	Any maze that has been exported should have the option to show the solvable version of the maze as well	Should Have	1
<b>System Administrator</b>	Maze must be stored in a database on the server. To ensure that it is stored in one place and can be backed up	Must Have	4
<b>System Administrator</b>	Be able to log in with a username and password to access stored files	Must Have	2

## **Release Planning**

Below are the release plans that have been determined for the life of the project. Our team's estimated velocity per sprint is 10, meaning that we will ideally have a maximum of 20 story points per release.

### **Release 1**

**Delivery Date:** Wednesday 18th of May

**Total Story Points: 21**

This release includes the most vital stories required to be implemented for a functioning maze design tool. It includes stories regarding the first and second phase of generating the maze design tool. This release will deliver an initial functioning maze design tool.

#### **Maze Development - Part 1**

Stories relating to the initial creation of an automated maze generating tool. This also includes the ability to customize the title and credentials.

User Story	Story Points
Creating an automatically generated maze that can be edited post creation. Maze has a maximum size of 100x100 units.	8
Be able to give the maze a title, also providing credentials of who created the maze and finally including date and time the maze was first created and last edited	1
<b>Story Point Sub-Total</b>	<b>9</b>

#### **Maze Development - Part 2**

Stories relating to more specialized mazes, where there is an option to insert a logo as well as a maze targeted towards children and the database storage on the server.

User Story	Story Points
Maze having the option of inserting a logo within it which is not in the path of the maze itself	4
Change the entrance and exit of the maze to a logo/picture that is targeted towards children	4
Maze must be stored in a database on the server. To ensure that it is stored in one place and can be backed up	4
<b>Story Point Sub-Total</b>	<b>12</b>

## Release 2

**Delivery Date:** Friday 3rd of June

**Total Story Points: 19**

In this release, the maze interaction will be implemented. This will bring account interaction as well as viewing information to the tool.

### Maze Interaction - Part 1

Stories relating to the interaction between the user and their account. This includes logging into their account, as well as viewing information about the mazes created.

User Story	Story Points
Be able to log in with a username and password to access stored files	2
Be able to see a list of created mazes, along with who created them and the date and time.	2
Requires a user-friendly GUI interface for both the maze designer and the user	2
A toggle button to show the optimal/fastest path for the maze that's being created to be solved	4
<b>Story Point Sub-Total</b>	10

### Maze Interaction - Part 2

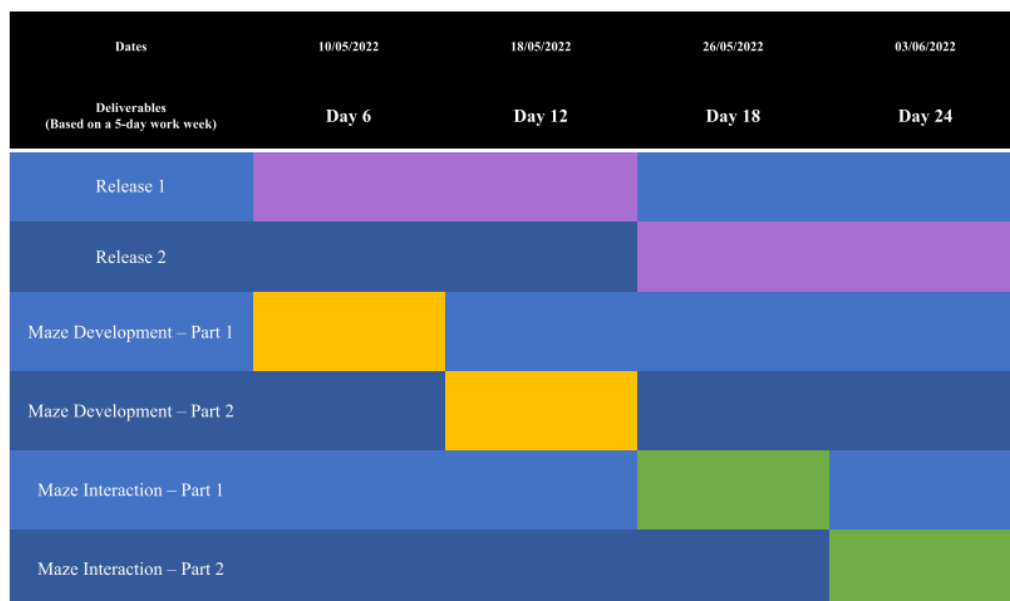

This feature will implement stories relating to the remaining maze interaction stories which are exporting the maze and having the option of showing the percentage of the remaining maze left to explore.

User Story	Story Points
Any maze that has been exported should have the option to show the solvable version of the maze as well	1
Have a button to show that at any point of starting the maze that it can be completed. This includes a % to show how much of the maze is left to explore.	8
<b>Story Point Sub-Total</b>	9
